## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-21, and 41-61, drawn to an apparatus of an ultrasound bandage, classified in class 602, subclass 54.
  - II. Claims 22-40, and 62-81, drawn to a method for manufacturing the bandage, classified in class 602, subclass 900.
  - III. Claims 82-87, drawn to method for accelerating the healing of wounds, classified in class 604, subclass 28.

The inventions are distinct, each from the other because of the following reasons:

2. Groups I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method for manufacturing can be carried out by an apparatus that doesn't have a transducer material on the adhesive layer.
3. Groups I and III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using can be used with a product that doesn't

have a transducer material on the adhesive layer and the process can be used with only one wound instead of a plurality of wounds.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Bruce Gray on July 19, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
